Andy Williams is a security professional with over 25 years' experience in security risk management, threat assessment, security, corporate security, development and strategy for multi-national companies and organizations

Since 2012 Andy has worked as a security consultant working on numerous threat assessment, risk management design and development projects in hotel, real estate and other business sectors as well as travel security risk management projects, with specialist knowledge and experience of high threat locations.

Andy has an expansive range of international experience, global networks, is well known in the security industry and has an ability to always deliver for clients.

From a consulting support perspective, has a unique insight and added value from being a corporate and government entity security director, a regional director of security and onsite operational security manager. From managing security consulting services – to becoming the provider and deliverer of such services.

Capabilities:

- Strategic direction, project co-ordination and peer review throughout design/development phases of large-scale multi-use and multi-site projects.
- Application of risk management and security standards into business operations for both developed and emerging markets.
- Design and implementation of physical security systems/processes, which maximize functionality, flexibility and value to business operations.
- Develop and maintain relationships, which maximize collaboration and innovative solutions on both large scale projects and individual assignments.
- Ensure cost effective, practical and sustainable solutions for all projects undertaken.
- Strategic understanding of technical and information technology based products and processes that can be adapted within the context of risk management.
- Tender document evaluation and preparation of tender scopes on behalf of clients.
- Development and implementation of compliance audit programs;
- Co-ordination and management of business integrity, brand protection and due diligence requirements
- Development, implementation and delivery of competency based training and educational programs;
- Public private partnership advice and consultation in relation to security in public places and counter terrorism initiatives
- Development and review of emergency planning, crisis management and business continuity programs.
